Lilly Announces Webcast to Discuss Pain Management Portfolio

INDIANAPOLIS, June 8, 2017 /PRNewswire/ -- Eli Lilly and Company (NYSE: LLY) will conduct a webcast on Monday, June 19, 2017, to discuss the company's pain management portfolio, including data from three Phase 3 studies of galcanezumab, an investigational treatment for the prevention of episodic and chronic migraine, and data from one Phase 3 study of lasmiditan, an investigational treatment for the acute treatment of migraine. The webcast will begin at 10 a.m. Eastern time.

The Phase 3 data will also be presented at the 59th Annual Scientific Meeting of the American Headache Society.

Investors, media and the general public can access a live webcast of the conference call through a link that will be posted on Lilly's website at https://investor.lilly.com/events.cfm. A replay will also be available on the website following the conference call.

About Eli Lilly and Company
Lilly is a global healthcare leader that unites caring with discovery to make life better for people around the world. We were founded more than a century ago by a man committed to creating high-quality medicines that meet real needs, and today we remain true to that mission in all our work. Across the globe, Lilly employees work to discover and bring life-changing medicines to those who need them, improve the understanding and management of disease, and give back to communities through philanthropy and volunteerism.
