

Anne White to Retire as Executive Vice President and President, Lilly Neuroscience

August 20, 2025

INDIANAPOLIS, Aug. 20, 2025 /PRNewswire/ -- Eli Lilly and Company (NYSE: LLY) today announced that Anne White, executive vice president and president, Lilly Neuroscience, will be retiring from Lilly after 30 years of service, effective Dec. 31, 2025.

She will continue to serve in her role and as a member of Lilly's Executive Committee until her retirement date. An internal and external search is underway for her successor.

"Anne's career has been defined by a deep commitment to advancing medicines for some of the most challenging diseases affecting patients globally," said David A. Ricks, Lilly's chair and CEO. "As leader of Lilly Neuroscience, Anne led the global launch of our first ever Alzheimer's treatment. Prior to that role, Anne led Lilly Oncology and was instrumental in the development of our late-stage portfolio and the acquisition of Loxo Oncology. On behalf of our Board, leadership team, and thousands of employees she has touched, I would like to thank Anne for her service to our company and our mission."

During her tenure, White has overseen the development, approval, and launch of multiple new medicines and successfully led efforts to reduce drug development timelines across the pipeline and bring new medicines to patients faster. Through her leadership, the company's neuroscience portfolio has expanded to new medicines in neurodegeneration, pain, substance use disorders, and psychiatry.

A strong champion for inclusion at Lilly, she is on the board of Lambda Legal and has been recognized as one of the Most Influential Women Executives in Corporate America by WomenInc., as well as a Woman of Influence in Indianapolis by the Indianapolis Business Journal.

About Lilly

Lilly is a medicine company turning science into healing to make life better for people around the world. We've been pioneering life-changing discoveries for nearly 150 years, and today our medicines help tens of millions of people across the globe. Harnessing the power of biotechnology, chemistry and genetic medicine, our scientists are urgently advancing new discoveries to solve some of the world's most significant health challenges: redefining diabetes care; treating obesity and curtailing its most devastating long-term effects; advancing the fight against Alzheimer's disease; providing solutions to some of the most debilitating immune system disorders; and transforming the most difficult-to-treat cancers into manageable diseases. With each step toward a healthier world, we're motivated by one thing: making life better for millions more people. That includes delivering innovative clinical trials that reflect the diversity of our world and working to ensure our medicines are accessible and affordable. Lilly Cautionary Statement Regarding Forward-Looking Statements

This press release contains certain forward-looking statements regarding leadership changes and expectations for the future. All statements other than statements of historical fact are statements that could be deemed forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. The words "will", "anticipate" and similar expressions are intended to identify forward-looking statements. Actual results may differ materially due to various factors. The following include some but not all of the factors that could cause actual results or events to differ from those anticipated, including the significant costs and uncertainties in the pharmaceutical research and development process, including with respect to the timing and process of obtaining regulatory approvals; the impact and uncertain outcome of acquisitions and business development transactions and related costs; intense competition affecting the company's products, pipeline, or industry; market uptake of launched products and indications; continued pricing pressures and the impact of actions of governmental and private actors affecting pricing of, reimbursement for, and patient access to pharmaceuticals, or reporting obligations related thereto; safety or efficacy concerns associated with the company's or competitive products; dependence on relatively few products or product classes for a significant percentage of the company's total revenue and a consolidated supply chain; the expiration of intellectual property protection for certain of the company's products and competition from generic and biosimilar products; the company's ability to protect and enforce patents and other intellectual property and changes in patent law or regulations related to data package exclusivity; information technology system inadequacies, inadequate controls or procedures, security breaches, or operating failures; unauthorized access, disclosure, misappropriation, or compromise of confidential information or other data stored in the company's information technology systems, networks, and facilities, or those of third parties with whom the company shares its data and violations of data protection laws or regulations; issues with product supply and regulatory approvals stemming from manufacturing difficulties, disruptions, or shortages, including as a result of unpredictability and variability in demand, labor shortages, third-party performance, quality, cyber-attacks, or regulatory actions related to the company's and third-party facilities; reliance on third-party relationships and outsourcing arrangements; the use of artificial intelligence or other emerging technologies in various facets of the company's operations, which may exacerbate competitive, regulatory, litigation, cybersecurity, and other risks; the impact of global macroeconomic conditions, including uneven economic growth or downturns or uncertainty, trade and other global disputes and interruptions, including related to tariffs, trade protection measures, and similar restrictions, international tension, conflicts, regional dependencies, or other costs, uncertainties, and risks related to engaging in business globally; fluctuations in foreign currency exchange rates, changes in interest rates and inflation or deflation; significant and sudden declines or volatility in the trading price of the company's common stock and market capitalization; litigation, investigations, or other similar proceedings involving past, current, or future products or activities; changes in tax law and regulations, tax rates, or events that differ from our assumptions related to tax positions; regulatory changes and developments; regulatory oversight and actions regarding the company's operations and products; regulatory compliance problems or government investigations; risks from the proliferation of counterfeit, misbranded, adulterated or illegally compounded products; actual or perceived deviation from environmental-, social-, or governance-related requirements or expectations; asset impairments and restructuring charges; and changes in accounting and reporting standards. For additional information about the factors that could cause actual results or events to differ materially from forward-looking statements, please see the company's latest Form 10-K and subsequent Forms 8-K and 10-Q filed with the Securities and Exchange Commission. You should not place undue reliance on forward-looking statements contained in this press release and the related

attachments, which, except as otherwise noted, speak only as of the date of this release. Except as is required by law, the company expressly disclaims any obligation to publicly release any revisions to forward-looking statements contained in this press release and the related attachments to reflect events or circumstances after the date of this release.
